GENERAL INFORMATION

This complete concept for roller blinds offers solutions for almost any requirement in the residential as well as the contract market. The components in the range can be used modularly offering endless configuration options to suit different window types and sizes. The compatibility throughout the range furthermore allows for easy modifying and upgrading. All components were 'designed for assembly' which ensures quick and easy assembly. The range includes several unique components for easy alignment of the system.

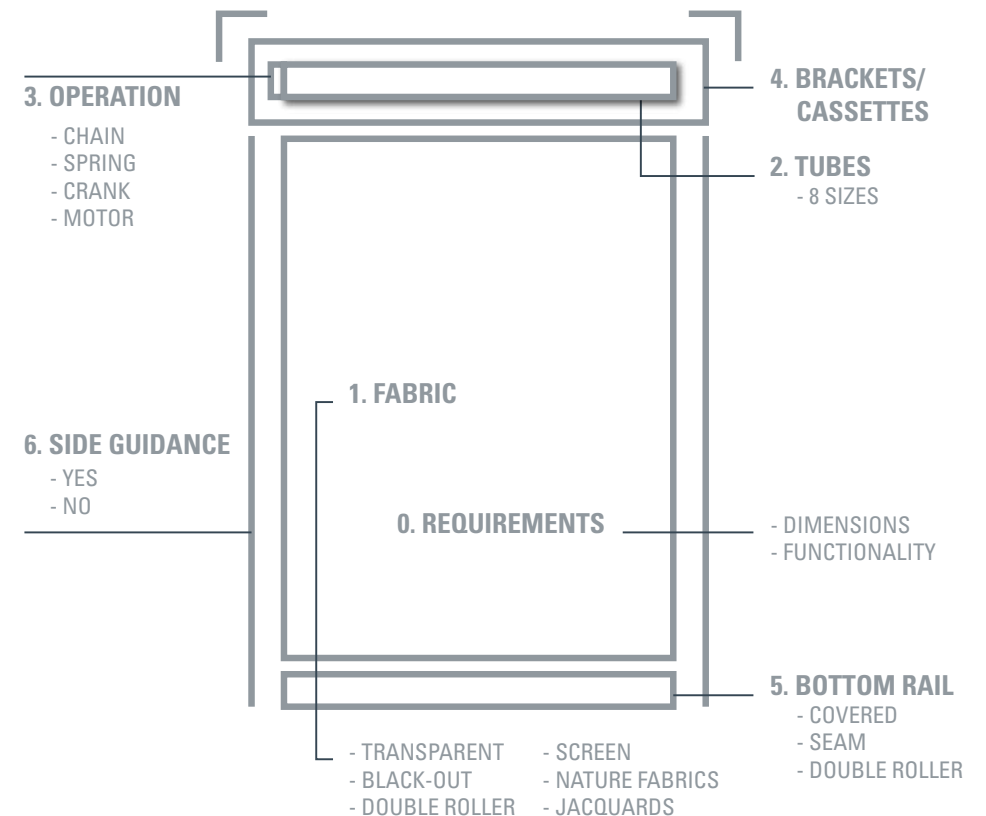

ADVANTAGES

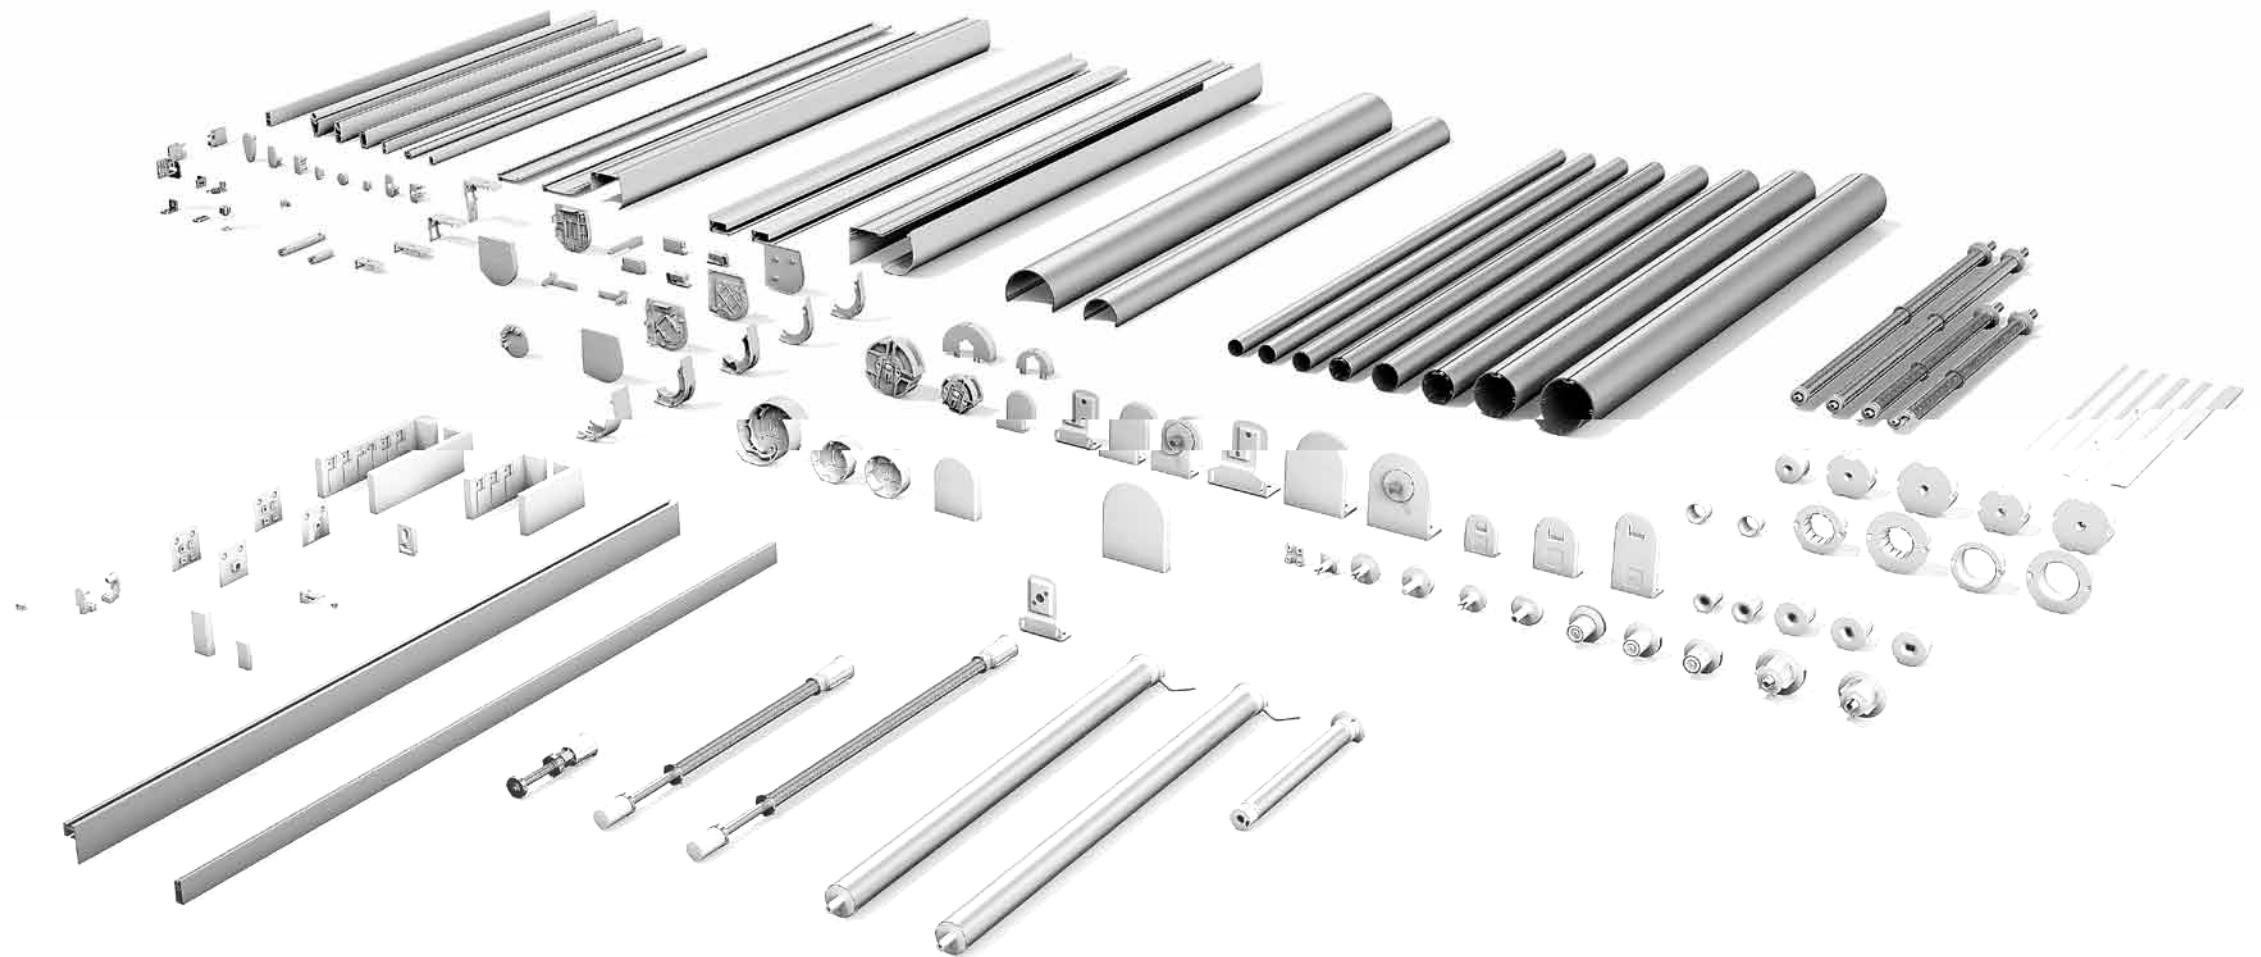

- Endless configuration possibilities with components that can be used modularly
- Select from different options in fabrics, tubes, operation types, frames, bottom rails and side guidances
- Several finishes and colours available
- Easy alignment with patented adjustable bearing pin
- Suitable for use of screen fabrics
- Multiple blinds can be operated with a single motor with adjustable connecting plug
- Range includes:
 - black-out cassette
 - design cover
 - design brackets
 - motorization

THE CONCEPT

For any roller blind configuration the starting point is a combination of the requirements regarding window size and type and the functional and decorative wishes, which results in a choice for a fabric type. The Absolute roller blind concept is divided into five component groups: tubes, operation types, frames, bottom rails and side guidances. Each group offers a wide choice of options – ranging from basic to luxurious – that can be combined to make endless roller blind configurations.

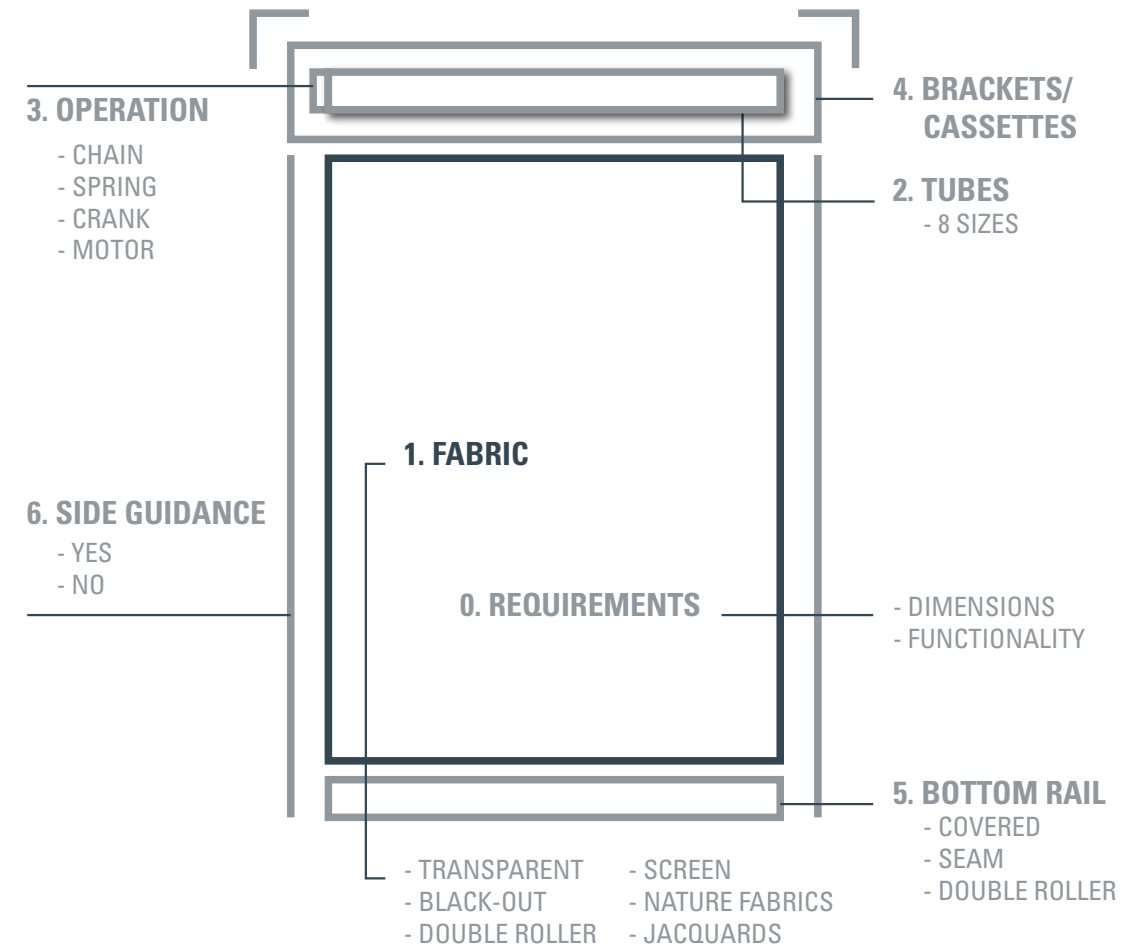

SPECIFICATIONS
PARTS LIST

1. FABRICS

The specifications of the fabric are very important for defining the configuration of the roller blind. Our roller blind collection offers many different fabric qualities and varieties ranging from transparent to black-out from double roller to screen fabrics and from nature fabrics to jacquards.

TRANSPARENT

Our extensive collection of transparent roller blind fabric collection offers a wide range of qualities, colours and designs to suit functional as well as decorative requirements.

In order to create the perfect light a wide variety of transparencies is available. All fabrics can be used in any almost any roller blind type.

BLACK-OUT

Recommended for bed rooms and 100% black-out when combined with cassette and side profiles.

Ultra thin black-out fabric New York is perfect for the application in skylight blinds and cassettes. The Coulisserie range of black-out fabrics offers an extensive range of plain colours and unique designs.

SCREEN

Screen fabrics have perfect light, visual and heat control properties. Unique luxurious jacquard woven screen fabrics, screens with a metallic shine as well as Ultimate screen fabrics with a couture look are part of the collection. The combination of perfect functional properties and fashionable new ideas makes this technical fabric perfect for residential interior design.

For a perfect hanging conduct of screen fabrics an extra heavy bottom rail is available as well as tubes with a hold-down strip for a perfect attachment of the fabric to the tube.

DOUBLE ROLLER BLIND

Create the perfect light and view. The range offers stylish luxurious varieties as well as fabrics with XL and XXL stripes. With the patented adjustable bearing pin the double roller blind can easily be aligned for perfectly aligned stripes.

Absolute Roller Blind offers a wide range of system varieties for double roller blinds, ranging from regular to design, including perfectly matching bottom rails.

NATURE FABRICS

Delicately woven natural materials beautifully filter the light. Our Nature fabrics create a timeless luxury look and are available in many different varieties. A unique tape for finishing the edges that prevents them from fraying is available.

The luxury look is complete with the design brackets of the Absolute Roller Blind system.

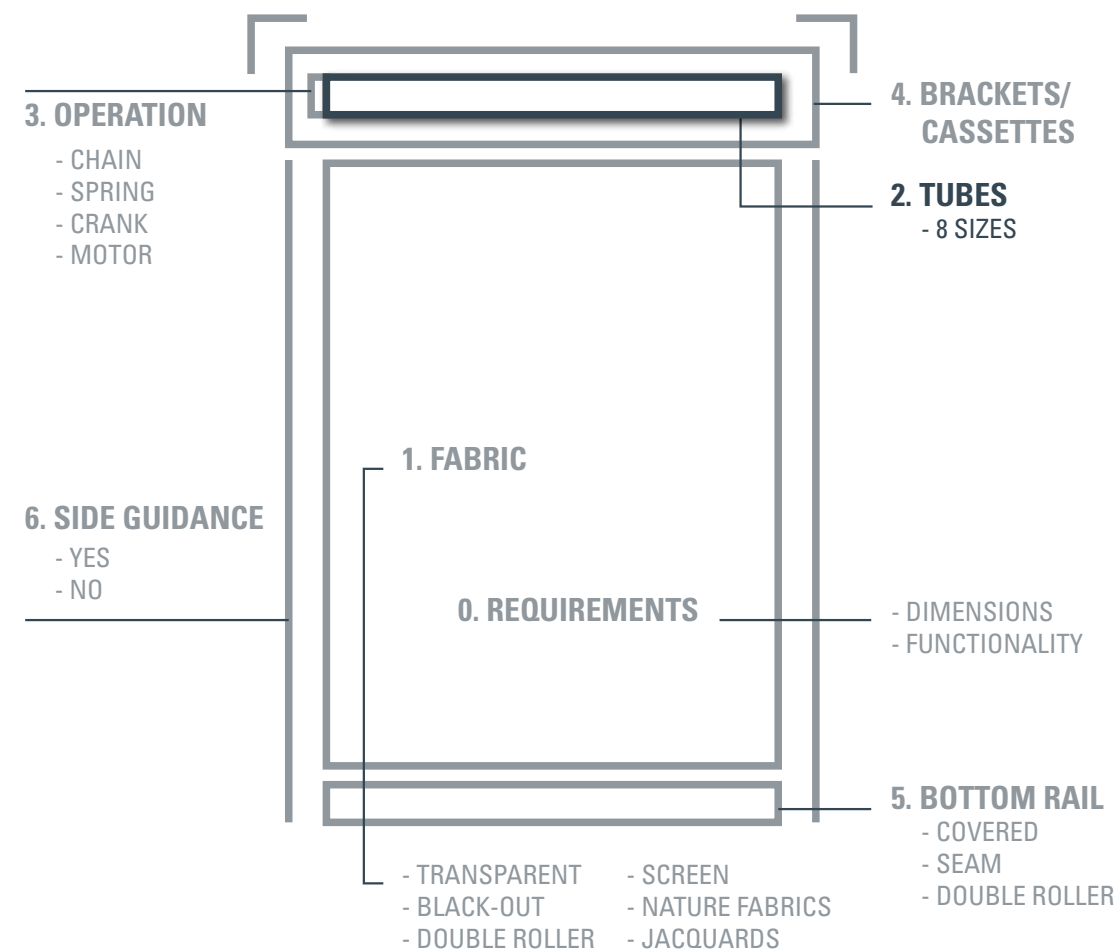

JACQUARDS

Our wide collection of jacquard woven roller blind fabrics ranges from basic plain varieties to luxurious jacquards.

The exclusive fabrics from the Ultimate jacquard range combine stylish designs with rich colours. They perfectly combine with the Ultimate roller blind system.

2. TUBES

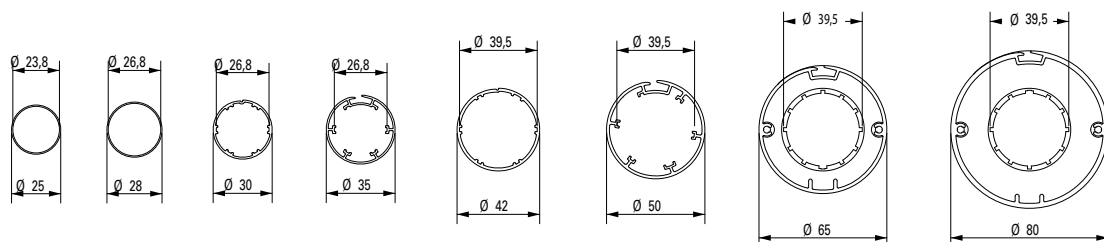

Absolute Roller Blind offers eight tube diameters ranging from 25-80 mm to suit all types of fabrics and blind sizes.

TUBES

6. SIDE GUIDANCE

With an optional side guidance the roller blind is optimally stabilized.
For a 100% black-out blind a side profile is available.

If you do not have a Coulisse login account or if you would like more information about technical and/or marketing support please contact your Internal Sales Support contact.

COMPANY PROFILE

Window decorations are more than just products: they are an expression of style and individuality. This has been Coulisse's vision since its establishment in 1992, and it has helped to make the business a leading supplier of both ready-made window-decoration products for DIY retailers and components for assemblers and wholesalers of made-to-measure products. Coulisse offers its clients a comprehensive range of products, from wooden Venetian blinds to roller blinds and from vertical blinds to pleated blinds. Thanks to a constant focus on innovation, creativity and flexibility, Coulisse is even capable of starting new trends and anticipating specific client needs. Coulisse products are developed in Enter and manufactured throughout the world.
