**To whom it may concern,**

Emerson SRL is writing this letter to recommend Omifa Impex SRL as a reliable office fit-out contractor and furniture supplier.

In a few words Emerson can be best described by our brand promise: "Emerson is where technology and engineering come together to create solutions for the benefit of our customers, driven without compromise for a world in action."

At Emerson, there's no slowing down or short-term thinking. There's a world out there that needs "Never Been Done Before" solutions and each and every one of us is driven to deliver on the possibilities. Together we'll face the obstacles that stand in the way of progress and work to leave the world in a better place than we found it. That's what's next. That's Emerson.

We have described shortly our values in order for one to better understand that the standards that guide us are the same standards we impose on our partners. These very standards were the foundation on which the Emerson-Omifa partnership was built.

Our company's collaboration with them has started in March 2014 after Omifa won the furniture tender for the M4 building PSG Hub Cluj.

Omifa was responsible for the design, production, packaging, delivery, documentation, handling, and installation of custom made furniture on 5 different floors of the M4 building situated in the Tetarom Industrial Park in Cluj-Napoca, No. 4 Emerson Street. The project included workstations for 2, 4, 6, 8 and even 10 persons, especially developed to meet our employees' requirements; meeting tables that varied in shape, size and finish, lockers, cabinets, custom mobile coat hangers, high tech integrated electrical socket systems, executive furniture, personalized reception desks on the ground and first floors and even a special concept waiting area on the ground floor.

In this particular matter, the Omifa design and research teams were especially flexible and showed a lot of forward thinking, always changing the design in order to better suit our spaces and, at the same time, to offer the deserved amount of comfort for the persons using the furniture. Furthermore, on an engineering level, our supplier paid a lot of care, showing us what details to keep in mind when it comes to high class furniture, as each worktop has 16 built-in metallic shells that connect the workstations' structure via special screws.

One of the most memorable moments was the selection of the color schemes for the workstations on each floor. It was a very dynamic process in which the Omifa designers showed us how to express our personalities with courage, through color.

Throughout the project the Omifa team advised us every step of the way. The drive and abilities of the fit-out crew left us wanting to see true professionals in action again.

As the furniture quickly populated each floor, we have observed the staff's proper conduct as well as their high spirit, but mostly we took notice of their profound respect for the schedule.

Therefore OMIFA is a reliable supplier, able to execute complex projects in the best conditions.

We recommend OMIFA IMPEX SRL as a proper business partner that has proven to be dedicated, hardworking, innovative and ingenious.
